

# The Kelkar Education Trust's V G Vaze College of Arts, Science and Commerce (Autonomous)

Syllabus for T.Y.B.Sc. - I.T. (June 2020 Onwards)

Programme: B.Sc.

Semester V& VI

**Subject: Information Technology** 

	Semest	$\mathbf{er} - \mathbf{V}$		
Course Code	Course Type	Course Title	Credits	
SIT501	Skill Enhancement Course	Software Project Management	2	
SIT502	Skill Enhancement Course	Internet of Things	2	
SIT503	Skill Enhancement Course	Advanced Web Programming	2	
SIT504	Discipline Specific Elective (Any	Artificial Intelligence	2	
SIT505	One)	Linux System Administration	2	
SIT506	Discipline Specific Elective (Any	Enterprise Java	2	
SIT507	One)	Next Generation Technologies	2	
SITP501	Skill Enhancement Course Practical	Project Dissertation	2	
SITP502	Skill Enhancement Course Practical	Internet of Things Practical	2	
SITP503	Skill Enhancement Course	Advanced Web Programming	2	
	Practical	Practical		
SITP504	Discipline Specific Elective Practical	Artificial Intelligence Practical	2	
SITP505	(Any One)*	Linux Administration Practical	2	
SITP506	Discipline Specific Elective Practical	Enterprise Java Practical	2	
SITP507	(Any One)*	Next Generation Technologies	2	
	-	Practical		
		Total Credits	20	

All the practical mentioned in the syllabi are compulsory as per the courses chosen) The choice of Practical course is based on the theory Course. For Semester V, SIT504, SIT505, SIT506 and SIT507, the practical courses are SITP504, SITP505 SITP506, SITP507.

Semester VI				
Course Code	Course Type	Course Title	Credits	
SIT601	Skill Enhancement Course	Software Quality Assurance	2	
SIT602	Skill Enhancement Course	Security in Computing	2	
SIT603	Skill Enhancement Course	Business Intelligence	2	
SIT604	Discipline Specific Elective	Principles of Geographic Information Systems	2	
SIT605	(Any One)	Enterprise Networking		
SIT606	Discipline Specific Elective	IT Service Management	2	
SIT607	(Any One)	Cyber Laws	2	
SITP601	Skill Enhancement Course Practical	Project Implementation	2	
SITP602	Skill Enhancement Course Practical	Security in Computing Practical	2	
SITP603	Skill Enhancement Course Practical	Business Intelligence Practical	2	
SITP604	Discipline Specific Elective	Principles of Geographic Information Systems Practical	2	
SITP605	Practical (Any One)*  Enterprise Networking Practical			
SITP606	Skill Enhancement Course Practical	Advanced Mobile Programming	2	
		Total Credits	20	

All the practical mentioned in the syllabi are compulsory as per the courses chosen)
\*The choice of Practical course is based on the theory Course. For Semester VI, SIT604, SIT605 the practical courses are SITP604, SITP605 respectively. Practical Course SITP606 is compulsory.

#### SEMESTER V

B. Sc. (Information Technology)		Semester – V	
Course Name: Software Project Management		Course Code: SIT501	
Periods per week (1 Period is 50 minutes)			5
Credits		2	
		Hours	Marks
Evaluation System Theory Examination		2	60
	Internal		40

Cours	Course Objective		
To ma	ke learner aware of		
1.	Basics of software project management.		
2.	Various project approaches and effort estimation.		
3.	Risk management, activity planning, and activity planning		
4.	People management in software development, managing contracts, monitoring and control		
5.	Software quality and team management		

Unit	Details	Lectures
I	Introduction to Software Project Management:Introduction, Why is Software Project Management Important? What is a Project? Software Projects versus Other Types of Project, Contract Management and Technical Project Management, Activities Covered by Software Project Management, Plans, Methods and Methodologies, Some Ways of Categorizing Software Projects, Project Charter, Stakeholders, Setting Objectives, The Business Case, Project Success and Failure, What is Management? Management Control, Project Management Life Cycle, Traditional versus Modern Project ManagementPractices.  Project Evaluation and Programme Management: Introduction, Business Case, Project Portfolio Management,  Evaluation Techniques, Risk Evaluation, Programme Management, Managing the Allocation of Resources within Programmes, Strategic Programme Management, Creating a Programme, Aids to Programme Management, Some Reservations about Programme Management, Benefits Management. An Overview of Project Planning: Introduction to Step Wise Project Planning, Step 0:Select Project, Step 1:Identify Project Scope and Objectives, Step 2:Identify Project Infrastructure, Step 3:Analyse Project Characteristics, Step 4:Identify Project Products and activities, Step5:EstimateEffortforEachActivity, Step6:IdentifyActivity Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and 10: Execute Plan/Lower Levels of Planning	Lectures 12

П	Selection of an Appropriate Project Approach: Introduction, Build or Buy? Choosing Methodologies and Technologies, Software Processes and Process Models, Choice of Process Models, Structure versus Speed of Delivery, The Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model.  Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottom- up Estimating, The Top-down Approach and Parametric Models, ExpertJudgement, Estimating by Analogy, AlbrechtFunctionPointAnalysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb.	12
III	Activity Planning: Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks.  Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A Framework for Dealing with Risk, Risk Identification, Risk Assessment, Risk Planning, Risk Management, EvaluatingRiskstotheSchedule,Boehm"sTop10RisksandCounter Measures, Applying the PERT Technique, Monte Carlo Simulation, Critical ChainConcepts.  Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence.	12
IV	Monitoring and Control: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM).  Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance.  Managing People in Software Environments: Introduction, Understanding Behaviour, Organizational Behaviour: A Background, Selecting the Right Person for the Job, Instruction in the Best	12

	Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress, Stress Management, Health and Safety, Some Ethical and Professional Concerns.	
V	Working in Teams: Introduction, becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership.  Software Quality: Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process Capability Models, Techniques to Help Enhance Software Quality, Testing, Software Reliability, QualityPlans.  Project Closeout: Introduction, Reasons for Project Closure, Project Closeout Report.	12

Cours	Course Outcome		
Learn	Learnerv will be able to		
CO1	Evaluate and plan the project.		
CO2	Access the risks in project.		
CO3	Estimate the efforts for project.		
CO4	Get the knowledge of working in teams.		
CO5	Motivate to work as software engineer.		

Books and References:					
Sr. No.	Title	Author/s	Publisher	Edition	Year
1.	Software Project Management	Bob Hughes, Mike Cotterell, Rajib Mall	TMH	6 <sup>th</sup>	2018
2.	Project Management and Tools & Technologies – An overview	Shailesh Mehta	SPD	1 <sup>st</sup>	2017
3.	Software Project Management	Walker Royce	Pearson		2005

B. Sc. (Information Technology)		Semester – V	
Course Name: Project Dissertation		Course Code: SITP501	
Periods per week (1 Period is 50 minutes)		3	
Credits		2	
		Hours	Marks
Evaluation System Practical Examination		2	50
	Internal		

The details are given in Appendix – I

B. Sc. (Information Technology)		Semester – V	
Course Name: Internet of Things		Course Code: SIT502	
Periods per week (1 Period is 50 minutes)		5	
Credits		2	
		Hours	Marks
Evaluation System Theory Examination		2	60
	Internal		40

Cours	Course Objective		
To make learner aware and use			
1.	Basics, design principles for connected devices		
2.	Various types of prototyping, Prototyping embedded devices.		
3.	Prototyping physical designs and online components.		
4.	Techniques for writing the embedded code.		
5.	Business model and ethics.		

Unit	Details	Lectures
I	The Internet of Things: An Overview: The Flavour of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, EnchantedObjects, Who is Making the Internet of Things?  Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, Affordances.  Internet Principles: Internet Communications: An Overview, IP, TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP AddressAssignment, Dynamic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports, Application Layer Protocols, HTTP, HTTPS: Encrypted HTTP, Other Application Layer Protocols.	12
II	Thinking About Prototyping: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalisation, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community.  Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness.	12

III	Prototyping the Physical Design: Preparation, Sketch, Iterate, and Explore, Nondigital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling.  Prototyping Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing the API, Using Curl to Test, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence	12
	Protocol, Constrained Application Protocol.	
IV	Techniques for Writing Embedded Code: Memory Management, Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries, Debugging.  Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, Learning from History, The Business Model Canvas, Who Is the Business Model For? Models, Make Thing, Sell Thing, Subscriptions, Customisation, be a Key Resource, Provide Infrastructure: Sensor Networks, take a Percentage, Funding an Internet of Things Startup, Hobby Projects and Open Source, Venture Capital, Government Funding, Crowdfunding, Lean Startups.	12
V	Moving to Manufacture: What Are You Producing? Designing Kits, Designing Printed circuit boards, Software Choices, The Design Process, Manufacturing Printed Circuit Boards, Etching Boards, Milling Boards. Assembly, Testing, Mass-Producing the Case and Other Fixtures, Certification, Costs, Scaling Up Software, Deployment, Correctness and Maintainability, Security, Performance, User Community.  Ethics: Characterizing the Internet of Things, Privacy, Control, Disrupting Control, Crowdsourcing, Environment, Physical Thing, Electronics, Internet Service, Solutions, The Internet of Things as Part of the Solution, Cautious Optimism, The Open Internet of Things Definition.	12

Cours	Course Outcome			
Learner will be able to				
CO1	Apply the concepts of IOT.			
CO2	Write embedded code for IOT based applications.			
CO3	Analyse and use data received from sensors.			
CO4	Apply IOT to different applications.			
CO5	Motivate to develop IOT based applications / projects.			

Books and References:

Practical	Details			
No				
0	Starting Raspbian OS, Familiarising with Raspberry Pi Components and interface, Connecting to ethernet, Monitor, USB.			
1	Displaying different LED patterns with Raspberry Pi.			
2	Displaying Time over 4-Digit 7-Segment Display using Raspberry Pi			
3	Raspberry Pi Based Oscilloscope			
4	Controlling Raspberry Pi with, Buzzer sensor.			
5	Setting up Wireless Access Point using Raspberry Pi			
6	Fingerprint Sensor interfacing with Raspberry Pi			
7	Raspberry Pi GPS Module Interfacing			
8	IoT based Web Controlled Home Automation using Raspberry Pi			
9	Visitor Monitoring with Raspberry Pi and Pi Camera			
10	Interfacing Raspberry Pi with RFID.			
11	Building Google Assistant with Raspberry Pi.			
12	Installing Windows 10 IoT Core on Raspberry Pi			

B. Sc. (Information Tech	Semester – V			
Course Name: Advanced Web Programming			Course Code: SIT503	
Periods per week (1 Period is 50	5			
Credits	2			
	Hours	Marks		
<b>Evaluation System</b>	Theory Examination	2	60	
	Internal		40	

# Course Objective To make learner aware of Basics of .NET framework and C# fundamentals. Web form fundamentals and various form controls used in website development using C#. Error handling and state management, master page development in C#. ADO.NET fundamentals, data binding and data controls. XML, Security fundamental and ASP.NET AJAX basics.

Unit	Details	Lectures
I	Introducing .NET: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library.  The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods.  Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types, Understanding Namespaces and Assemblies, Advanced Class Programming.	12
II	Web Form Fundamentals: Writing Code, Using the Code-Behind Class, Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application.  Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and AutoPostBack, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The SiteMapPath Control, The TreeView Control, The MenuControl.	12

III	From Handling Lagging and Tracing Avaiding Common Errors			
111	Error Handling, Logging, and Tracing: Avoiding Common Errors,			
	Understanding Exception Handling, Handling Exceptions, Throwing			
	Your Own Exceptions, Using Page Tracing			
	<b>State Management</b> : Understanding the Problem of State, Using View			
	State, Transferring Information Between Pages, Using Cookies,			
	Managing Session State, Configuring Session State, Using			
	Application State, Comparing State ManagementOptions			
	Styles, Themes, and Master Pages: Styles, Master Page Basics,			
	Advanced Master Pages,			
IV	ADO.NET Fundamentals: Understanding Databases, Configuring			
	Your Database, Understanding SQL Basics, Understanding the Data			
	Provider Model, Using Direct Data Access, Using Disconnected Data	12		
	Access.			
	Data Binding: Introducing Data Binding, Using Single-Value Data			
	Binding, Using Repeated-Value Data Binding, Working with Data			
	Source Controls,			
	The Data Controls: The GridView, Formatting the GridView,			
	selecting a GridView Row, Editing with the GridView, Sorting and			
	Paging the GridView, Using GridView Templates, The DetailsView			
	and FormView			
V	XML: XML Explained, The XML Classes, XML Validation, XML			
•	Display and Transforms.			
	Security Fundamentals: Understanding Security Requirements,			
	Authentication and Authorization, Forms Authentication, Windows			
	Authentication and Authorization, Forms Authentication, Windows Authentication.			
	ASP.NET AJAX: Understanding Ajax, Using Partial Refreshes,			
	Using Progress Notification, Implementing Timed Refreshes,			
	Working with the ASP.NET AJAX ControlToolkit.			

Cours	Course Outcome			
Learn	Learner will be able to			
CO1	Design a responsive web site and demonstrate Rich Internet Application.			
CO2	Implement interactive and dynamic web page(s) using HTML,CSS,AJAX, C#			
	with .NET concepts.			
CO3	Develop database oriented web application.			
CO4	Build dynamic web site using server side .NET technology and Database			
	connectivity.			
CO5	Motivate to work as website developer.			

Books a	Books and References:

Course Name: Advanced Web Programming Practical		Course Code: SITP503		
Periods per week (1 Period is 50 minutes)			3	
Credits			2	
		Hours	Marks	
Evaluation System Practical Examination		2	50	
	Internal			

List	of Practical			
1.	Working with basic C# and ASP .NET			
a.	Create an application that obtains four int values from the user and displays the product.			
b.	Create an application to demonstrate string operations.			
c.	Create an application that receives the (Student Id, Student Name, Course Name, Date of Birth) information from a set of students. The application should also display the information of all the students once the data entered.			
d.	Create an application to demonstrate following operations			
u.	i. GenerateFibonacciseries.  ii. Test for prime numbers.			
	iii. Testforvowels.  iv. Use of foreach loop witharrays			
	v. Reverse a number and find sum of digits of a number.			
2.	Working with Object Oriented C# and ASP .NET			
a.	Create simple application to perform following operations			
	i. FindingfactorialValue ii. Money Conversion			
	iii.QuadraticEquation iv. TemperatureConversion			
b.	Create simple application to demonstrate use of following concepts			
	i. FunctionOverloading ii. Inheritance (alltypes)			
	iii.Constructoroverloading iv. Interfaces			
c.	Create simple application to demonstrate use of following concepts			
	i. Using Delegatesand events  ii. Exceptionhandling			
3.	Working with Web Forms and Controls			
a.	Create a simple web page with various sever controls to demonstrate setting and use of			
	their properties. (Example :AutoPostBack)			
b.	Demonstrate the use of Calendar control to perform following operations.			
	a) Display messages in a calendarcontrol b) Display vacation in a calendar			
	control			
	c) Selected day in a calendar control usingstyle d) Difference between twocalendar			
	dates			
c.	Demonstrate the use of Treeview control perform following operations.			
	a) Treeviewcontrolanddatalist b) Treeviewoperations			
	, , ,			
4.	Working with Form Controls			
a.	Create a Registration form to demonstrate use of various Validation controls.			

b.	Create Web Form to demonstrate use of Adrotator Control.
c.	Create Web Form to demonstrate use User Controls.
5.	Working with Navigation, Beautification and Master page.
a.	Create Web Form to demonstrate use of Website Navigation controls and Site Map.
b.	Create a web application to demonstrate use of Master Page with applying Styles and Themes for page beautification.
c.	Create a web application to demonstrate various states of ASP.NET Pages.
6.	Working with Database
a.	Create a web application bind data in a multiline textbox by querying in another textbox.
b.	Create a web application to display records by using database.
c.	Demonstrate the use of Datalist link control.
7.	Working with Database
a.	Create a web application to display Databinding using dropdownlist control.
b.	Create a web application for to display the phone no of an author using database.
c.	Create a web application for inserting and deleting record from a database. (Using Execute-Non Query).
8.	Working with data controls
a.	Create a web application to demonstrate various uses and properties of SqlDataSource.
b.	Create a web application to demonstrate data binding using DetailsView and FormView Control.
c.	Create a web application to display Using Disconnected Data Access and Databinding using GridView.
9.	Working with GridView control
a.	Create a web application to demonstrate use of GridView control template and GridView hyperlink.
b.	Create a web application to demonstrate use of GridView button column and GridView events.
c.	Create a web application to demonstrate GridView paging and Creating own table format using GridView.
10.	Working with AJAX and XML
a.	Create a web application to demonstrate reading and writing operation with XML.
b.	Create a web application to demonstrate Form Security and Windows Security with proper Authentication and Authorization properties.
c.	Create a web application to demonstrate use of various Ajax controls.
11	
11.	Programs to create and use DLL

B. Sc. (Information Technology)		Semester – V		
Course Name: Artificial Intelligence		Course Code: SIT504		
			(Elective I)	
Periods per week (1 Period is 50 minutes)		5		
Credits		2		
		Hours	Marks	
<b>Evaluation System</b>	Theory Examination	2	60	
	Internal		40	

Course Objective		
To make learner understand		
Concept of Artificial Intelligence and Intelligent Agent.		
2. Various search algorithms in AI used for solving problems.		
3. Concept of adversarial search and logical agent.		
4. Concept of first order logic and inference of first order logic.		
5. Concept of classical planning and knowledge representation.		

Unit	Details	Lectures
I	<b>Introduction:</b> What is Artificial Intelligence? Foundations of AI,	
	history, the state of art AI today.	12
	<b>Intelligent Agents:</b> agents and environment, good behavior, nature of	
	environment, the structure of agents.	
II	Solving Problems by Searching: Problem solving agents, examples	
	problems, searching for solutions, uninformed search, informed search	
	strategies, heuristic functions.	12
	Beyond Classical Search: local search algorithms, searching with	
	non-deterministic action, searching with partial observations, online	
	search agents and unknown environments.	
III	Adversarial Search: Games, optimal decisions in games, alpha-beta	
	pruning, stochastic games, partially observable games, state-of-the-are	
	game programs.	12
	<b>Logical Agents:</b> Knowledge base agents, The Wumpus world, logic, propositional logic, propositional theorem proving, effective propositional model checking, agents based on propositional logic.	
IV	First Order Logic: Syntax and semantics, using First Order Logic,	
	Knowledge engineering in First Order Logic.	12
	Inference in First Order Logic: propositional vs. First Order, unification and lifting, forward and backward chaining, resolution.	12

V	Planning: Definition of Classical Planning, Algorithms for planning	
	as state space search, planning graphs, other classical planning	
	approaches, analysis of planning approaches, Time, Schedules and	
	resources, hierarchical planning, Planning and Acting in Nondeterministic	12
	Domains, multiagentplanning,	
	Knowledge Representation: Categories and Objects, events, mental	
	events and objects, reasoning systems for categories, reasoning with	
	default information, Internet shopping world	

Cours	Course Outcome	
Learner will be able to		
CO1	Understand the concept of Artificial Intelligence.	
CO2	Understand the concept of intelligent agent.	
CO3	Apply search algorithm for problem solving.	
CO4	Represent the knowledge for problem solving.	
CO5	Apply AI concepts in various development areas.	

Books a	Books and References:					
Sr. No.	Title	Author/s	Publisher	Edition	Year	
1.	Artificial Intelligence: A Modern Approach	Stuart Russel and Peter Norvig	Pearson	3 <sup>rd</sup>	2015	
2.	A First Course in Artificial Intelligence	Deepak Khemani	TMH	First	2017	
3.	Artificial Intelligence: A Rational Approach	Rahul Deva	Shroff publishers	1 <sup>st</sup>	2018	
4.	Artificial Intelligence	Elaine Rich, Kevin Knight and Shivashankar Nair	TMH	3 <sup>rd</sup>	2009	
5.	Artificial Intelligence & Soft Computing for Beginners	Anandita Das Bhattacharjee	SPD	1 <sup>st</sup>	2013	

B. Sc. (Information Technology)		Semester – V	
Course Name: Artificial Intelligence Practical		Course Code: SITP504 (Elective I)	
Periods per week (1 Period is 50	3		
Credits		2	
		Hours	Marks
<b>Evaluation System</b>	Practical Examination	2	50
	Internal		

Practi No		Details
1	a	Write a program to implement depth first search algorithm.
	b	Write a program to implement breadth first search algorithm.
2	a	Write a program to simulate 4-Queen / N-Queen problem.
	b	Write a program to solve tower of Hanoi problem.
3	a	Write a program to implement alpha beta search.
	b	Write a program for Hill climbing problem.
4	a	Write a program to implement A* algorithm.
	b	Write a program to implement AO* algorithm.
5	a	Write a program to solve water jug problem.
	b	Design the simulation of tic – tac – toe game using min-max algorithm.
6	a	Write a program to solve Missionaries and Cannibals problem.
	b	Design an application to simulate number puzzle problem.
7	a	Write a program to shuffle Deck of cards.
	b	Solve traveling salesman problem using artificial intelligence technique.
8	a	Solve the block of World problem.
	b	Solve constraint satisfaction problem
9	a	Derive the expressions based on Associative law
	b	Derive the expressions based on Distributive law
10	a	Write a program to derive the predicate.
		(for e.g.: Sachin is batsman, batsman is cricketer) - >Sachin is Cricketer.
	b	Write a program which contains three predicates: male, female, parent. Make
		rules for following family relations: father, mother, grandfather, grandmother,
		brother, sister, uncle, aunt, nephew and niece, cousin.
		Question:
		i. Draw FamilyTree.
		ii. Define: Clauses, Facts, Predicates and Rules with conjunction and
		disjunction

The practical can be implemented in C / C++ / Java/ Python / R /Prolog / LISP or any other language.

B. Sc. (Information Technology)		Semester – V	
Course Name: Linux System Administration		Course Code: SIT505	
	(Elective I)		
Periods per week (1 Period is 50	5		
Credits		2	
		Hours	Marks
<b>Evaluation System</b>	Theory Examination	2	60
	Internal		40

Cours	Course Objective			
To ma	ke learner understand and use			
1.	Basics of Red Hat Enterprise Linux OS, shell, system administrative tasks, manage			
	software.			
2.	Management of storage, users, permissions etc. How to connect to network?			
3.	Securing the server, setting up cryptographic services, concept of file sharing.			
4.	Configuration of DNS, DHCP, mail server, Apache.			
5.	Shell scripting, clustering and setting up of installation server.			

Unit	Details	Lectures
I	Introduction to Red Hat Enterprise Linux: Linux, Open Source and Red Hat, Origins of Linux, Distributions, Duties of Linux System Administrator.  Command Line: Working with the Bash Shell, Getting the Best of Bash, Useful Bash Key Sequences, Working with Bash History, Performing Basic File System Management Tasks, Working with Directories, Piping and Redirection, Finding Files  System Administration Tasks: Performing Job Management Tasks, System and Process Monitoring and Management, Managing Processes with ps, Sending Signals to Processes with the kill Command, using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting Up Logrotate  Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories, Installing Software with Yum, QueryingSoftware, Extracting Files from RPM Packages	12
II	Configuring and Managing Storage: Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes,	12

	Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage Devices, Creating Swap Space,	
	Working with EncryptedVolumes  Connecting to the Network: Understanding NetworkManager,	
	Working with Services and Runlevels, Configuring the Network with	
	NetworkManager, Working with system-config-network,	
	NetworkManager Configuration Files, Network Service Scripts,	
	Networking from the Command Line, Troubleshooting Networking, Setting Up IPv6, Configuring SSH, Enabling the SSH Server, Using	
	the SSH Client, Using PuTTY on Windows Machines, Configuring	
	Key-Based SSH Authentication, Using Graphical Applications with	
	SSH, Using SSH Port Forwarding, Configuring VNC Server	
	AccessWorking with Users, Groups, and Permissions: Managing	
	Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration	
	Files, Creating Groups, Using Graphical Tools for User, and Group	
	Management, Using External Authentication Sources, the	
	Authentication Process, sssd, nsswitch, Pluggable Authentication	
	Modules, Managing Permissions, the Role of Ownership, Basic	
	Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with	
	umask, Working with Attributes	
III	<b>Securing Server with iptables:</b> Understanding Firewalls, Setting Up a	
	Firewall with system-config-firewall, Allowing Services, Trusted	
	Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule,	
	Configuration Example, Advanced iptables Configuration, Configuring	
	Logging, The Limit Module, ConfiguringNAT	
	Setting Up Cryptographic Services: Introducing SSL, Proof of	
	Authenticity: The Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy	12
	Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys,	12
	Encrypting Files with GPG, GPG Signing, Signing RPM Files	
	Configuring Server for File Sharing: What is NFS? Advantages and	
	Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring	
	Automount, Configuring Samba, Setting Up a Samba File Server,	
	Samba Advanced Authentication Options, Accessing Samba Shares,	
	Offering FTP Services.	
IV	Configuring DNS and DHCP:Introduction to DNS, The DNS	
	Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name	
	Server, Setting Up a Primary Name Server, Setting Up a Secondary	12
	Name Server, Understanding DHCP, Setting Up a DHCP Server	
]		

	Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP Configuring Apache on Red Hat Enterprise Linux: Configuring the Apache Web Server, creating a Basic Website, Understanding the Apache Configuration Files, Apache Log Files, Working with Virtual Hosts, Securing the Web Server with TLS Certificates, Configuring Authentication, Setting Up Authentication with httpasswd, Configuring LDAP Authentication, Setting UpMySQL	
V	Introducing Bash Shell Scripting: Introduction, Elements of a Good Shell Script, Executing the Script, Working with Variables and Input, Understanding Variables, Variables, Subshells, and Sourcing, Working with Script Arguments, Asking for Input, Using Command Substitution, Substitution Operators, Changing Variable Content with Pattern Matching, Performing Calculations, Using Control Structures, Using ifthenelse, Using case, Using while, Using until, Using for, Configuring booting withGRUB.  High-Availability Clustering: High-Availability Clustering, The Workings of High Availability, High-Availability Requirements, Red Hat High-Availability Add-on Software, Components, Configuring Cluster-Based Services, Setting Up Bonding, Setting Up Shared Storage, Installing the Red Hat High Availability Add-On, Building the Initial State of the Cluster, Configuring Additional Cluster Properties, Configuring a Quorum Disk, Setting Up Fencing, Creating Resources and Services, Troubleshooting a Nonoperational Cluster, Configuring GFS2 File Systems  Setting Up an Installation Server: Configuring a Network Server as an Installation Server, Setting Up a TFTP and DHCP Server for PXE Boot, Installing the TFTP Server, Configuring DHCP for PXE Boot, Creating the TFTP PXE Server Content, creating a Kickstart File, Using a Kickstart File to Perform an Automated, Installation, Modifying the Kickstart File with, system-config-kickstart, Making Manual Modifications to the Kickstart File	12

Course Outcome Lerner will be able to		
CO1	Install Red Hat Linux and various software on this OS.	
CO2	Configure various servers like DNS, DHCP, Mail Server etc.	
CO3	Manage the users, permissions, storage.	
CO4	Write shell scripts.	
CO5	Secure the server with iptables.

Course Objective			
To make learner understand and use			
Java EE Architecture, JAVA Servlet, servlet API and lifecycle and working.			
2. Concept of Cookies, session, request dispatcher, file handling etc.			
3. Concept of java server pages, JSP action elements, Implicit objects, tag libraries.			
4. Concept of JAVA beans and its types, interceptor, JNDI.			
5. Concept of JPA and Hibernate and its applications.			

Uni	Details	Lectures
t		
I	Understanding Java EE: What is an Enterprise Application? What is java enterprise edition? JavaEETechnologies, JavaEEevolution, Glassfishserver  JavaEE Architecture, Server and Containers: Types of System Architecture, JavaEEServer, JavaEEContainers.  Introduction to Java Servlets: The Need for Dynamic Content, JavaServlet Technology, Why Servlets? What can Servlets do? Servlet API and Lifecycle: JavaServletAPI, The ServletSkeleton, The ServletLifeCycle, A Simple Welcome Servlet Working with Servlets: Getting Started, Using Annotations Instead of Deployment Descriptor.  Working with Databases: What Is JDBC? JDBC Architecture, Accessing Database, The ServletGUI and Database Example.	12
II	Request Dispatcher: Resquestdispatcher Interface, Methods of Requestdispatcher, Requestdispatcher Application.  COOKIES: Kinds of Cookies, Where Cookies Are Used? Creating Cookies Using Servlet, Dynamically Changing the Colors of A Page SESSION: What Are Sessions? Lifecycle of HttpSession, Session Tracking With Servlet API, A Servlet Session Example  Working with Files: Uploading Files, Creating Upload File Application, Downloading Files, Creating a Download File Application. Working with Non-Blocking I/O CreatingaNon-Blocking Read Application, Creating The Web Application, Creating Java Class, Creating Servlets, Retrieving The File, Creating index.jsp	12

III	Introduction To Java ServerPages: Why use Java Server Pages? Disadvantages Of JSP, JSP v\s Servlets, Life Cycle of a JSP Page, How does a JSP function? How does JSP execute? About Java Server Pages Getting Started With Java ServerPages: Comments, JSP Document, JSP Elements, JSP GUI Example. ActionElements: Including other Files, Forwarding JSP Page to Another Page, Passing Parameters for other Actions, Loading a Javabean. Implicit Objects, Scope and ElExpressions: Implicit Objects, Character Quoting Conventions, Unified Expression Language[UnifiedEl], Expression Language.  Java Server Pages Standard Tag Libraries: What is wrong in using JSP Scriptlet Tags? How JSTLFixes JSPScriptlet's Shortcomings? Disadvantages Of JSTL, Tag Libraries.	
IV	Introduction To Enterprise Javabeans: Enterprise Bean Architecture, Benefits of Enterprise Bean, Types of Enterprise Bean, Accessing Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans Working with Session Beans: When to use Session Beans? Types of Session Beans, Remote and Local Interfaces Accessing Interfaces, Lifecycle of Enterprise Beans, Packaging Enterprise Beans, Example of Stateful Session Bean, Example of Stateless Session Bean, Example ofSingleton Session Beans. Working with Message DrivenBeans: Lifecycle of a Message Driven Bean, Uses of Message Driven Beans, The Message Driven Beans Example. Interceptors: Request and Interceptor, Defining An Interceptor, Around Invoke Method, Applying Interceptor, Adding An Interceptor To An Enterprise Bean, Build and Run the Web Application. Java Naming and Directory Interface: What is Naming Service? What is Directory Service? What is Java Naming and Directory interface? Basic Lookup, JNDI Namespace in Java EE, Resources and	12
V	JNDI, Data source Resource Definition in Java EE.  Persistence, Object/Relational Mapping And JPA: What is Persistence? Persistence in Java, Current Persistence Standards in	12
	Java, Why another Persistence Standards? Object/Relational Mapping,  Introduction to Java Persistence API: The Java Persistence API,	
	JPA ,ORM, Database and the Application, Architecture of JPA, How	
	JPA Works? JPA Specifications.  Writing JPA Application: Application Requirement Specifications,	
	Software Requirements, The Application Development Approach,	
	Creating Database and Tables in Mysql, creating a Web Application, Adding the Required Library Files, creating a Javabean Class,	
	Creating Persistence Unit [Persistence. Xml], Creating JSPS, The JPA	
	Application Structure, Running the JPA Application.  Introduction to Hibernate: What is Hibernate? Why Hibernate?	
	Hibernate, Database and The Application, Components of	

Hibernate,	Architecture of	of Hibernate. Ho	w Hibernate W	orks?	
Writing	Hibernate	<b>Application:</b>	Application	Requirement	
Specificati	ions, Software	Requirements, 7	The Application	n Development	
Approach,	Creating Da	tabase and Tabl	les In Mysql, c	reating a Web	
Applicatio	n, Adding the	Required Libra	ary Files, creati	ing a Javabean	
Class, C	reating Hiber	nate Configurati	ion File, Addi	ng a Mapping	
Class, Crea	ating JSPS, Ru	inning The Hiber	rnate Application	on.	

Course Outcome		
Learner will be able to		
CO1	Develop a JAVA program using servlet.	
CO2	Develop Java Server Pages.	
CO3	Create and use JAVA beans.	
CO4	Develop Hibernate based application.	
CO5	Motivate to become a JAVA application developer.

<b>Evaluation System</b>	Practical Examination	2	50	
	Internal			

List	of Practical
1.	Implement the following Simple Servlet applications.
a.	Create a simple calculator application using servlet.
b.	Create a servlet for a login page. If the username and password are correct then it says message "Hello <username>" else a message "loginfailed"</username>
c.	Create a registration servlet in Java using JDBC. Accept the details such as Username, Password, Email, and Country from the user using HTML Form and store the registration details in the database.
2.	Implement the following Servlet applications with Cookies and Sessions.
a.	Using Request Dispatcher Interface create a Servlet which will validate the password entered by the user, if the user has entered "Servlet" as password, then he will be forwarded to Welcome Servlet else the user will stay on the index.html page and an error message will be displayed.
b.	CreateaservletthatusesCookiestostorethenumberoftimes a user has visited servlet.
c.	Create a servlet demonstrating the use of session creation and destruction. Also check whether the user has visited this page first time or has visited earlier also using sessions.
3.	Implement the Servlet IO and File applications.
a.	Create a Servlet application to upload and download a file.
b.	Develop Simple Servlet Question Answer Application using Database.
c.	Create simple Servlet application to demonstrate Non-Blocking Read Operation.
4.	Implement the following JSP applications.
a.	Develop a simple JSP application to display values obtained from the use of intrinsic objects of various types.
b.	Develop a simple JSP application to pass values from one page to another with validations. (Name-txt, age-txt, hobbies-checkbox, email-txt, gender-radio button).
c.	Create a registration and login JSP application to register and authenticate the user based on username and password using JDBC.

5.	Implement the following JSP JSTL and EL Applications.
a.	Create an html page with fields, eno, name, age, desg, salary. Now on submit this datatoaJSPpagewhichwillupdatetheemployeetableofdatabasewithmatching eno.
b.	Create a JSP page to demonstrate the use of Expression language.
c.	Create a JSP application to demonstrate the use of JSTL.
6.	Implement the following EJB Applications.
a.	Create a Currency Converter application using EJB.
b.	Develop a Simple Room Reservation System Application Using EJB.
c.	Develop simple shopping cart application using EJB [Stateful Session Bean].
7.	Implement the following EJB applications with different types of Beans.
a.	Develop simple EJB application to demonstrate Servlet Hit countusing Singleton Session Beans.
b.	Develop simple visitor Statistics application using Message Driven Bean [Stateless Session Bean].
c.	Develop simple Marks Entry Application to demonstrate accessing Database using EJB.
8.	Implement the following JPA applications.
a.	Develop a simple Inventory Application Using JPA.
b.	Develop a Guestbook Application Using JPA.
c.	Create simple JPA application to store and retrieve Book details.
9.	Implement the following JPA applications with ORM and Hibernate.
a.	Develop a JPA Application to demonstrate use of ORM associations.
b.	Develop a Hibernate application to store Feedback of Website Visitor in MySQL Database.
c.	Develop a Hibernate application to store and retrieve employee details in MySQL Database.
10.	Implement the following Hibernate applications.
a.	Develop an application to demonstrate Hibernate One- To -One Mapping Using Annotation.
b.	Develop Hibernate application to enter and retrieve course details with ORM Mapping.
c.	Develop a five page web application site using any two or three Java EE Technologies.

B. Sc. (Information Technol	Semester – V		
<b>Course Name: Next Generation</b>	Course Code: SIT507 (Elective II)		
Periods per week (1 Period is 50	5		
Credits			2
		Hours	Marks
<b>Evaluation System</b>	Theory Examination	2	60
	Internal		40

Course Objective		
To make learner understand and use		
1. Concept of JSON.		
2. Concept of Big data, NoSQL, MongoDB.		
3. MongoDB architecture, shell and data model.		
4. MongoDB Storage engine, use cases, limitation and best practices.		
5. Concept of JQuery.		

Unit	Details	Lectures
I	JSON: Introduction, JSON Grammar, JSON Values, JSON Tokens,	
	Syntax, JSON vs XML, Data Types, Objects, Arrays, Creating JSON,	12
	JSON Object, Parsing JSON, Persisting JSON, Data Interchange, JSON	
	PHP, JSON HTML,	
II	Big Data: Getting Started, Big Data, Facts About Big Data, Big Data	
	Sources, Three Vs of Big Data, Volume, Variety, Velocity, Usage of Big	
	Data, Visibility, Discover and Analyze Information, Segmentation and	
	Customizations, Aiding Decision Making, Innovation, Big Data	
	Challenges, Policies and Procedures, Access to Data, Technology and	
	Techniques, Legacy Systems and Big Data, Structure of Big Data, Data	
	Storage, Data Processing, Big Data Technologies	
	<b>NoSQL:</b> SQL, NoSQL, Definition, A Brief History of NoSQL, ACID vs.	12
	BASE, CAP Theorem (Brewer's Theorem), The BASE, NoSQL	
	Advantages and Disadvantages, Advantages of NoSQL, Disadvantages of	
	NoSQL, SQL vs. NoSQL Databases, Categories of NoSQL Databases	
	Introducing MongoDB: History, MongoDB Design Philosophy, Speed,	
	Scalability, and Agility, Non-Relational Approach, JSON-Based	
	Document Store, Performance vs. Features, Running the Database	
	Anywhere, SQL Comparison	
III	The MongoDB Data Model: The Data Model, JSON and BSON, The	
	Identifier (_id), Capped Collection, Polymorphic Schemas, Object-	
	Oriented Programming, Schema Evolution	12
	Using MongoDB Shell: Basic Querying, Create and Insert, Explicitly	
	Creating Collections, Inserting Documents Using Loop, Inserting by	

#### The Kelkar Education Trust's

#### V G Vaze College of Arts, Science and Commerce (Autonomous)

	Explicitly Specifying _id, Update, Delete, Read, Using Indexes, Stepping Beyond the Basics, Using Conditional Operators, Regular Expressions, MapReduce, aggregate(), Designing an Application's Data Model, Relational Data Modeling and Normalization, MongoDB Document Data Model Approach  MongoDB Architecture: Core Processes, mongod, mongo, mongos, MongoDB Tools, Standalone Deployment, Replication, Master/Slave Replication, Replica Set, Implementing Advanced Clustering with Replica Sets, Sharding, Sharding Components, Data Distribution Process, Data Balancing Process, Operations, Implementing Sharding, Controlling Collection Distribution (Tag-Based Sharding), Points to Remember When Importing Data in a Sharded Environment, Monitoring for Sharding, Monitoring the Config Servers, Production Cluster Architecture, Scenario 1, Scenario 2, Scenario 3, Scenario 4	
IV	MongoDB Storage Engine: Data Storage Engine, Data File (Relevant for MMAPv1), Namespace (.ns File), Data File (Relevant for WiredTiger), Reads and Writes, How Data Is Written Using Journaling, GridFS – The MongoDB File System, The Rationale of GridFS, GridFSunder the Hood, Using GridFS, Indexing, Types of Indexes, Behaviors and Limitations MongoDB Use Cases: Use Case 1 -Performance Monitoring, Schema Design, Operations, Sharding, Managing the Data, Use Case 2 – Social Networking, Schema Design, Operations, Sharding.  MongoDB Limitations: MongoDB Space Is Too Large (Applicable for MMAPv1), Memory Issues (Applicable for Storage Engine MMAPv1), 32-bit vs. 64-bit, BSON Documents, Namespaces Limits, Indexes Limit, Capped Collections Limit - Maximum Number of Documents in a Capped Collection, Sharding Limitations, Shard Early to Avoid Any Issues, Shard Key Can't Be Updated, Shard Collection Limit, Select the Correct Shard Key, Security Limitations, No Authentication by Default, Traffic to and from MongoDB Isn't Encrypted, Write and Read Limitations, Case-Sensitive Queries, Type-Sensitive Fields, No JOIN, Transactions, MongoDB Not Applicable Range  MongoDB Best Practices: Deployment, Hardware Suggestions from the MongoDB Site, Few Points to be Noted, Coding, Application Response Time Optimization, Data Safety, Administration, Replication Lag, Sharding, Monitoring	12
V	The End of Disk? SSD and In-Memory Databases: The End of Disk?, Solid State Disk, The Economics of Disk, SSD-Enabled Databases, In-Memory Databases, TimesTen, Redis, SAP HANA, VoltDB, Oracle 12c "in-Memory Database, Berkeley Analytics Data Stack and Spark, Spark Architecture  jQuery: Introduction, Traversing the DOM (add,addself,children,closest,contents,end,find,next,nextall,parent,prev,pre vAll,siblings), DOM Manipulation with jQuery(insert,remove,replace methods  after,append, appendTo,before,clone,empty,html,prepend,prependTo,remove,replaceAll	12

,replaceWith,text,wrap),	
JQuery Effects(jQuery Hide/Show, jQuery Fade, jQuery Slide, jQuery	
Animate, jQuery stop(). jQuery Callback, jQuery Chaining), Events	
(binding,removing, event attributes –	
altKey,ctrlKey,data,keyCode,metaKey, shiftKey,type, event methods -	
bind ,hover,on, off, ready, trigger,unbind,	
blur,click,dblclick,change,keydown,keypress,keyup,	
mouseover, mouseup, mousemove, select, submit), Ajax with jQuery,	
jQuery Plug-ins(flickerplate,slideshow)	

Cours	Course Outcome		
Learner will be able to			
CO1	Get familiar with the concept of Big Data, JSON, JQuery and NoSQL.		
CO2	Get hands on experience on unstructured database (MongoDB).		
CO3	Get hands on experience to connect MongoDB to PHP, Java and Python.		
CO4	Decide on the type of database used for real life application (structured or		
	unstructured).		
CO5	Apply the knowledge of big data to develop real life application.

#### SEMESTER VI

B. Sc. (Information Technology) Semester – VI			er – VI
<b>Course Name: Software Quality</b>	lity Assurance Course Code: SIT601		ode: SIT601
Periods per week (1 Period is 50 minutes)		5	
Credits		2	
		Hours	Marks
<b>Evaluation System</b>	Theory Examination	2	60
	Internal		40

Course	e Objective
To ma	ke learner understand and use
1.	Concepts in software quality management.
2.	Fundamentals of testing.
3.	Various testing techniques like boundary value testing, path testing etc.
4.	Software verification and validation process and v-test model.
5.	Levels of testing.

\_

Unit	Details	Lectures
I	Introduction to Quality: Historical Perspective of Quality, What is Quality? (Is it a fact or perception?), Definitions of Quality, Core Components of Quality, Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM), Quality Principles of Total Quality Management, Quality Management Through Statistical Process Control, Quality Management Through Cultural Changes, Continual (Continuous) Improvement Cycle, Quality in Different Areas, Benchmarking and Metrics, Problem Solving Techniques, Problem Solving Software Tools.  Software Quality: Introduction, Constraints of Software Product Quality Assessment, Customer is a King, Quality and Productivity Relationship, Requirements of a Product, Organisation Culture, Characteristics of Software, Software Development Process, Types of Products, Schemes of Criticality Definitions, Problematic Areas of Software Development Life Cycle, Software Quality Management, Why Software Has Defects? Processes Related to Software Quality, Quality Management System Structure, Pillars of Quality Management System, Important Aspects of QualityManagement.	12
II	Fundamentals of testing: Introduction, Necessity of testing, What is testing? Fundamental test process, The psychology of testing, Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench, Important Features of Testing Process, Misconceptions AboutTesting, Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning, Testing Process	12

	and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges in Testing, Test Team Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods, Structured Approach to Testing, Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies (Test Plan), Testing Process, Attitude Towards Testing (Common People Issues), Test Methodologies/Approaches, People Challenges in Software Testing, Raising Management Awareness for Testing, Skills Required byTester, Testing throughout the software life cycle, Software development models, Test levels, Test types, the targets of testing, Maintenance testing	
III	Unit Testing: Boundary Value Testing: Normal Boundary Value Testing, Robust Boundary Value Testing, Worst-Case Boundary Value Testing, Special Value Testing, Examples, Random Testing, Guidelines for Boundary Value Testing, Equivalence Class Testing: Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations. Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations, Path Testing: Program Graphs, DD-Paths, Test CoverageMetrics,BasisPathTesting,GuidelinesandObservations, Data Flow Testing: Define/Use Testing, Slice-Based Testing, Program Slicing Tools.	12
IV	Software Verification and Validation: Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews on the basis of Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification, Validation, Validation Workbench, Levels of Validation, Coverage in Validation, Acceptance Testing, Management of Verification and Validation, Software development verification and validationactivities.  V-test Model: Introduction, V-model for software, testing during Proposal stage, Testing during requirement stage, Testing during test planning phase, Testing during design phase, Testing during coding, VV Model, Critical Roles and Responsibilities.	12
V	Levels of Testing: Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, Integration Testing, Big-Bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing, TestingStages.  Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing, Regression Testing, Error Handling Testing, Manual Support Testing, Intersystem Testing, Control Testing, Smoke Testing, Adhoc Testing,	12

Parallel Testing, Execution Testing, Operations Testing, Compliance
Testing, Usability Testing, Decision Table Testing, Documentation
Testing, Training testing, Rapid Testing, Control flow graph,
Generating tests on the basis of Combinatorial Designs, State Graph,
Risk Associated with New Technologies, Process maturity level of
Technology, Testing Adequacy of Control in New technology usage,
Object Oriented Application Testing, Testing of Internal Controls,
COTS Testing, Client Server Testing, Web Application Testing,
Mobile Application Testing, eBusiness eCommerce Testing, Agile
Development Testing, Data Warehousing Testing.

Cours	e Outcome		
Lerne	Lerner will be able to		
CO1	Understand software testing and quality assurance as a fundamental component		
	of software life cycle		
CO2	Provide efficient delivery of software solutions and implement improvements in the		
	software development processes.		
CO3	Create test strategies and plans, design test cases, prioritize and execute the same.		
CO4	Apply software testing processes in relation to software development and project		
	management.		
CO5	To gain expertise in designing, implementation and development of computer		
	based systems.

B. Sc. (Information Tech	Sc. (Information Technology) Semester – VI		er – VI
Course Name: Project Implemen	mentation Course Code: SITP601		ode: SITP601
Periods per week (1 Period is 50	minutes)	3	
Credits		2	
		Hours	Marks
<b>Evaluation System</b>	Practical Examination	2	150
	Internal		-

The details are given in Appendix – I

B. Sc. (Information Technology) Semester – VI			er – VI
Course Name: Security in Computing		Course Code: SIT602	
Periods per week (1 Period is 50	Periods per week (1 Period is 50 minutes)		5
Credits		2	
		Hours	Marks
<b>Evaluation System</b>	Theory Examination	2	60
	Internal		40

Cours	e Objective
To ma	ke learner understand and use
1.	Basics of security, risk analysis, secure design principles.
2.	Concept of encryption, authentication and authorization, database security.
3.	Concept of secure network design, firewalls, wireless network security.
4.	Concept of IDPS, VOIP, operating system security models.
5.	Concept of secure application design, physical security and VM and cloud
	computing.

Unit	Details	Lectures
Ι	Information Security Overview: The Importance of Information	
	Protection, The Evolution of Information Security, Justifying Security	
	Investment, Security Methodology, How to Build a Security Program,	
	The Impossible Job, The Weakest Link, Strategy and Tactics,	12
	Business Processes vs. TechnicalControls.	
	Risk Analysis: Threat Definition, Types of Attacks, Risk Analysis.	
	<b>Secure Design Principles</b> : The CIA Triad and Other Models, Defense	
	Models, Zones of Trust, Best Practices for Network Defense.	
II	Authentication and Authorization: Authentication, Authorization	
	<b>Encryption</b> : A Brief History of Encryption, Symmetric-Key	
	Cryptography, Public Key Cryptography, Public KeyInfrastructure.	
	Storage Security: Storage Security Evolution, Modern Storage	10
	Security, Risk Remediation, Best Practices.	12
	Database Security: General Database Security Concepts,	
	Understanding Database Security Layers, Understanding Database-	
	Level Security, Using Application Security, Database Backup and	
	Recovery, Keeping Your Servers Up to Date, Database Auditing and	
	Monitoring.	
III	Secure Network Design: Introduction to Secure Network Design,	
	Performance, Availability, Security.	10
	Network Device Security: Switch and Router Basics, Network	12
	Hardening.	
	<b>Firewalls</b> : Overview, The Evolution of Firewalls, Core Firewall	
	Functions, Additional Firewall Capabilities, Firewall Design.	
	Wireless Network Security: Radio Frequency Security Basics, Data-	

	Link Layer Wireless Security Features, Flaws, and Threats, Wireless Vulnerabilities and Mitigations, Wireless Network Hardening Practices and Recommendations, Wireless Intrusion Detectionand Prevention, Wireless Network Positioning and Secure Gateways.	
IV	Intrusion Detection and Prevention Systems: IDS Concepts, IDS Types and Detection Models, IDS Features, IDS Deployment Considerations, Security Information and Event Management (SIEM). Voice over IP (VoIP) and PBX Security: Background, VoIP Components, VoIP Vulnerabilities and Countermeasures, PBX, TEM: Telecom Expense Management.  Operating System Security Models: Operating System Models, Classic Security Models, Reference Monitor, Trustworthy Computing, International Standards for Operating System Security.	12
V	Virtual Machines and Cloud Computing: Virtual Machines, Cloud Computing.  Secure Application Design: Secure Development Lifecycle, Application Security Practices, Web Application Security, Client Application Security, Remote Administration Security.  Physical Security: Classification of Assets, Physical Vulnerability Assessment, Choosing Site Location for Security, Securing Assets: Locks and Entry Controls, Physical Intrusion Detection.  NYDFS/GDPR guidelines	12

Course Outcome				
Learner will be able to				
CO1	Understand the security Design principles. Application design process.			
CO2	Implement secure software solutions.			
CO3	Understand and implement the concept of IDS and IPS.			
CO4	Authenticate and authorize.			
CO5	Understand and implement various concepts like database security, encryption,			
	firewall etc.			

Sr. No.	Title	Author/s	Publisher	Edition	Year

2.	Essential Cybersecurity Science	Josiah Dykstra	O"Reilly	Fifth	2017
3.	Principles of Computer Security: CompTIA Security+ and Beyond	Wm.ArthurCo nklin, GregWhite	McGraw Hill	Second	2010

B. Sc. (Information Tech	Semester – VI		
<b>Course Name: Security in Comp</b>	Course Code: SITP602		
Periods per week (1 Period is 50	3		
Credits	2		
		Hours	Marks
<b>Evaluation System</b>	2	50	
	Internal		-

Practical	Details
No	
1	Configure Routers
a	OSPF MD5 authentication.
b	NTP.
С	to log messages to the syslog server.
d	to support SSH connections.
2	Configure AAA Authentication
a	Configure a local user account on Router and configure authenticate on the console and vty lines using local AAA
b	Verify local AAA authentication from the Router console and the PC-A client
3	Configuring Extended ACLs
a	Configure, Apply and Verify an Extended Numbered ACL
4	Configure IP ACLs to Mitigate Attacks and IPV6 ACLs
a	Verify connectivity among devices before firewall configuration.
b	Use ACLs to ensure remote access to the routers is available only from
С	management station PC-C. Configure ACLs on to mitigate attacks.
d	Configuring IPv6 ACLs
u	Configuring it vo ACLs
5	Configuring a Zone-Based Policy Firewall
6	Configure IOS Intrusion Prevention System (IPS) Using the CLI
a	Enable IOS IPS.
b	Modify an IPS signature.
7	Layer 2 Security
a	Assign the Central switch as the root bridge.
b	Secure spanning-tree parameters to prevent STP manipulation attacks.
c	Enable port security to prevent CAM table overflow attacks.
8	Layer 2 VLAN Security

9	Configure and Verify a Site-to-Site IPsec VPN Using CLI
10	Configuring ASA Basic Settings and Firewall Using CLI
a	Configure basic ASA settings and interface security levels using CLI
b	Configure routing, address translation, and inspection policy using CLI
С	Configure DHCP, AAA, and SSH
d	Configure a DMZ, Static NAT, and ACLs

Course Objective			
To make learner understand and use			
Concept of BI and Decision Support System			
2. Mathematical models, data mining.			
3. Data mining algorithms (Classification / Clustering).			
4. Applications of BI.			
5. Knowledge management and expert system.			

Unit	Details	Lectures		
I	Business intelligence: Effective and timely decisions, Data, information and knowledge, The role of mathematical models, Business intelligence architectures, Ethics and business intelligence  Decision support systems: Definition of system, Representation of the decision-making process, Evolution of information systems, Definition of decision support system, Development of a decision support system	12		
II	Mathematical models for decision making: Structure of mathematical models, Development of a model, Classes of models  Data mining: Definition of data mining, Representation of input data, Data mining process, Analysis methodologies  Data preparation: Data validation, Data transformation, Data reduction			
III	Classification: Classification problems, Evaluation of classification models, Bayesian methods, Logistic regression, Neural networks, Support vector machines Clustering: Clustering methods, Partition methods, Hierarchical methods, Evaluation of clustering models	12		
IV	Business intelligence applications: Marketing models: Relational marketing, Sales force management, Logistic and production models: Supply chain optimization, Optimization models for logistics planning, Revenue management systems.  Data envelopment analysis: Efficiency measures, Efficient frontier, The CCR model, Identification of good operating practices	12		

345 A

V	Knowledge Management: Introduction to Knowledge Management,				
	Organizational Learning and Transformation, Knowledge Management				
	Activities, Approaches to Knowledge Management, Information				
	Technology (IT) In Knowledge Management, Knowledge Management	4.5			
	Systems Implementation, Roles of People in Knowledge Management	12			
	Artificial Intelligence and ExpertSystems:				
	Concepts and Definitions of Artificial Intelligence, Artificial				
	Intelligence Versus Natural Intelligence, Basic Concepts of Expert				
	Systems, Applications of Expert Systems, Structure of Expert Systems,				
	Knowledge Engineering, Development of Expert Systems				

Course Outcome			
Learner will be able to			
CO1	Understand the basic concept of Business Intelligence.		
CO2	Use various tools like SQL server, Power BI and R.		
CO3	Implement various data mining algorithm.		
CO4	Identify, organize and prepare data for mining purpose.		
CO5	Understand various concepts related to BI like knowledge management,		
	classification, expert system etc.

B. Sc. (Information Tech	Semester – VI		
Course Name: Business Intellige	Course Code: SITP603		
Periods per week (1 Period is 50	3		
Credits	2		
		Hours	Marks
<b>Evaluation System</b>	2	50	
	Internal		-

Practical	Details		
No 1	Import the legacy data from different sources such as (Excel, SqlServer, Oracle etc.) and load in the target system. (You can download sample database such as Adventureworks, Northwind, foodmart etc.)		
2	Perform the Extraction Transformation and Loading (ETL) process to construct the database in the Sqlserver.		
3	<ul><li>a. Create the Data staging area for the selecteddatabase.</li><li>b. Create the cube with suitable dimension and fact tables based on ROLAP, MOLAP and HOLAP model.</li></ul>		
4	<ul><li>a.Create the ETL map and setup the schedule for execution.</li><li>b. Execute the MDX queries to extract the data from the datawarehouse.</li></ul>		
5	a. Import the datawarehouse data in Microsoft Excel and create the Pivot table and Pivot Chart.		
	b. Import the cube in Microsoft Excel and create the Pivot table and Pivot Chart to perform data analysis.		
6	Apply the what – if Analysis for data visualization. Design and generate necessary reports based on the datawarehouse data.		
7	Perform the data classification using classification algorithm.		
8	Perform the data clustering using clustering algorithm.		
9	Perform the Linear regression on the given datawarehouse data.		
10	Perform the logistic regression on the given datawarehouse data.		

The BI tools such as Tableau / Power BI / BIRT / R / Excel or any other can be used.

B. Sc. (Information Tech	Semester – VI		
Course Name: Principles of Geographic Information		Course Code: SIT604	
Systems	(Elective I)		
Periods per week (1 Period is 50 minutes)		5	
Credits		2	
		Hours	Marks
<b>Evaluation System</b>	Theory Examination	2	60
	Internal		40

Course	Course Objective		
To ma	ke learner understand and use		
1.	Basics of GIS.		
2.	Concept of Stages of spatial data handling, GIS and spatial database.		
3.	Concept of spatial referencing, satellite-based positioning, data entry and		
	preparation in GIS.		
4.	Concept of spatial data analysis.		
5.	Concept of visualization process and map basics.		

Unit	Details	Lectures
I	A Gentle Introduction to GIS The nature of GIS: Some fundamental observations, Defining GIS, GIS systems, GIS science and GIS Applications, Spatial data and Geoinformation. The real world and representations of it: Models and modelling, Maps, Databases, Spatial databases and spatial analysis Geographic Information and Spatial Database Models and Representations of the real world Geographic Phenomena: Defining geographic phenomena, types of geographic phenomena, Geographic fields, Geographic objects, Boundaries Computer Representations of Geographic Information: Regular tessellations, irregular tessellations, Vector representations, Topology and Spatial relationships, Scale and Resolution, Representation of Geographic fields, Representation of Geographic objects Organizing and Managing Spatial Data The Temporal Dimension	12
П	Data Management and Processing Systems Hardware and Software Trends Geographic Information Systems: GIS Software, GIS Architecture and functionality, Spatial Data Infrastructure (SDI) Stages of Spatial Data handling: Spatial data handling and preparation, Spatial Data Storage and maintenance, Spatial Query and Analysis, Spatial Data Presentation.	12

	Database management Systems: Reasons for using a DBMS, Alternatives for data management, The relational data model, Querying the relational database.  GIS and Spatial Databases: Linking GIS and DBMS, Spatial	
777	database functionality.	
III	Spatial Referencing and Positioning Spatial Referencing: Reference surfaces for mapping, Coordinate Systems, Map Projections, Coordinate Transformations Satellite-based Positioning: Absolute positioning, Errors in absolute positioning, Relative positioning, Network positioning, code versus phase measurements, Positioning technology Data Entry and Preparation Spatial Data Input: Direct spatial data capture, Indirect spatial data capture, Obtaining spatial data elsewhere Data Quality: Accuracy and Positioning, Positional accuracy, Attribute accuracy, temporal accuracy, Lineage, Completeness, Logical consistency Data Preparation: Data checks and repairs, Combining data from multiple sources Point Data Transformation: Interpolating discrete data, Interpolating continuousdata	12
IV	Spatial Data Analysis Classification of analytical GIS Capabilities Retrieval, classification and measurement: Measurement, Spatial selection queries, Classification Overlay functions: Vector overlay operators, Raster overlay operators Neighbourhood functions: Proximity computations, Computation of diffusion, Flow computation, Raster based surface analysis Analysis: Network analysis, interpolation, terrain modeling GIS and Application models: GPS, Open GIS Standards, GIS Applications and Advances Error Propagation in spatial data processing: How Errors propagate, Quantifying error propagation	12
V	Data Visualization GIS and Maps, The Visualization Process Visualization Strategies: Present or explore? The cartographic toolbox: What kind of data do I have? How can I map my data? How to map? How to map qualitative data, How to map quantitative data, How to map the terrain elevation, How to map time series Map Cosmetics, Map Dissemination	12

Cours	Course Outcome		
Learn	er will be able to		
CO1	Create maps, images and apps to communicate spatial data in a meaningful way		
	to others.		
CO2	Apply basic graphic and data visualization concepts such as color theory,		
	symbolization, and use of white space.		
CO3	Apply mathematical concepts, including statistical methods, to data to be		
	used in geospatial analysis.		
CO4	Demonstrate the use of GIS tools to create maps that are fit-for-purpose and effectively		
	convey the information they are intended to.		
CO5	Motivate to develop GIS based applications.

Periods per week (1 Period is 50 minutes)		3	
Credits		2	
		Hours	Marks
<b>Evaluation System</b>	Practical Examination	2	50
	Internal		-

Practical No	Details
0	Familiarizing Quantum GIS: Installation of QGIS, datasets for both Vector and Raster data, Maps.
1	Creating and Managing Vector Data: Adding vector layers, setting properties, formatting, calculating line lengths and statistics
2	Exploring and Managing Raster data: Adding raster layers, raster styling and analysis, raster mosaicking and clipping
3	Making a Map, Working with Attributes, Importing Spreadsheets or CSV files Using Plugins, Searching and Downloading OpenStreetMap Data
4	Working with attributes, terrain Data
5	Working with Projections and WMS Data
6	Georeferencing Topo Sheets and Scanned Maps Georeferencing Aerial Imagery Digitizing Map Data
7	Managing Data Tables and Saptial data Sets: Table joins, spatial joins, points in polygon analysis, performing spatial queries
8	Advanced GIS Operations 1:Nearest Neighbor Analysis, Sampling Raster Data using Points or Polygons, Interpolating Point Data
9	Advance GIS Operations 2: Batch Processing using Processing Framework Automating Complex Workflows using Processing Modeler Automating Map Creation withPrint Composer Atlas
10	Validating Map data

B. Sc. (Information Technology)		Semester – VI

Course Outcome Learner will be able to		
	Understand various concepts of networking.	
CO2	Understand the working of various protocols like IP, DHCP etc.	
CO3	Configure different protocols.	
CO4	Implement various concepts like routing using CISCO packet tracer.	
CO5	Implement appropriate network protocol for real life situation.

<b>Evaluation System</b>	Practical Examination	2	50	
	Internal		-	

Practical No	Details
1	Configuring OSPF – I
A	Single-Area OSPF Link Costs and Interface Priorities
В	Multi-Area OSPF with Stub Areas and Authentication
2	Configuring OSPF – II
A	OSPF Virtual Links and Area Summarization
В	OSPF over Frame Relay
3	Redistribution and Administrative Distances
A	Redistribution Between RIP and OSPF
В	Manipulating Administrative Distances
4	BGP
A	Configuring BGP with Default Routing
В	Using the AS_PATH Attribute
С	BGP Route Reflectors and Route Filters
5	IPv6
A	Configuring OSPF for IPv6
В	Configuring 6to4 Tunnels
6	VLANs and EtherChannel
A	Static VLANS, VLAN Trunking, and VTP Domains and Modes
В	Configuring EtherChannel
7	Spanning Tree Protocol
A	Spanning Tree Protocol (STP) Default Behavior
В	Modifying Default Spanning Tree Behavior
8	VLAN and Spanning Tree
A	Per-VLAN Spanning Tree Behavior

В	Multiple Spanning Tree
9	Internal VLAN Routing
A	Inter-VLAN Routing with an External Router
В	Inter-VLAN Routing with an Internal Route Processor
10	Configure NAT Services

Course	Course Objective		
To make learner understand and use			
1.	Service life cycle, Service strategy principles, processes and risks.		
2.	Service design principles, processes and risk.		
3.	Service Transition principles, processes and risk.		
4.	Service operation principles, processes and risk.		
5.	Continual Service Improvement principles, processes and risk.		

Unit	Details	Lectures
I	IT Service Management: Introduction, What is service management? What are services? Business Process, Principles of Service management: Specialisation and Coordination, The agency principle, Encapsulation, Principles of systems, The service Life Cycle, Functions and processes across the life cycle.  Service Strategy Principles: Value creation, Service Assets, Service Provider Service Structures, Service Strategy Principles.  Service Strategy: Define the market, Develop the offerings, Develop Strategic Assets, Prepare for execution.  Challenges, Critical Success factors and risks Complexity, Coordination and Control, Preserving value, Effectiveness in measurement, Risks.	12
II	Service Design: Fundamentals, Service Design Principles: Goals, Balanced Design, Identifying Service requirements, identifying and documenting business requirements and drivers, Design activities, Design aspects, Subsequent design activities, Design constraints, Service oriented architecture, Business Service Management, Service Design Models  Service Design Processes: Service Catalogue Management, Service Level Management, Capacity Management, Availability Management, IT Service Continuity Management, Information Security Management, Supplier Management  Challenges, Critical Success factors and risks: Challenges, Risks	
III	Service Transition: Fundamentals, Service Transition Principles: Principles Supporting Service Transition, Policies for Service Transition Service Transition Processes: Transition planning and	12

 $_{^{
m Page}}60$ 

	support, Change Management, Service Asses Configuration Management, Service and Deployment Management, Service Validation and Testing, Evaluation, KnowledgeManagement.  Challenges, Critical Success factors and risks: Challenges, Critical Success factors, Risks, Service Transition under difficult Conditions.	
IV	Service Operation: Fundamentals, Service Operation Principles: Functions, groups, teams, departments and divisions, a chieving balance in service operations, Providing service, Operation staff involvement in service design and service transition, Operational Health, Communication, Documentation  Service Operation Processes: Event Management, Incident Management, Request fulfilment, Problem Management, Access Management, Operational activities of processes covered in other lifecycle phases.  Challenges, Critical Success factors and risks: Challenges, Critical Success factors, Risks	12
V	Continual Service Improvement(CSI) Principles: CSI Approach, CSI and organizational change, Ownership, CSI register, External and Internal drivers, Service level management, Knowledge management, The Deming cycle, Service Measurement, IT governance, Frameworks, models, standards and quality Systems, CSI inputs and outputs.  CSI Process: The seven-step improvement process. CSI Methods and Techniques: Methods and techniques, Assessments, benchmarking, Service Measurement, Metrics, Return on Investment, Service reporting, CSI and other service management processes, Organising for CSI: Organisational development, Functions, roles, Customer Engagement, Responsibility model - RACI, Competence and training.  Technology considerations: Tools to support CSI activities. Implementing CSI: Critical Considerations for implementing CSI, The start, Governance, CSI and organisational change, Communication Strategy andPlan	12

Cours	Course Outcome		
Learn	Learner will be able to		
CO1	Understand the service life cycle phases.		
CO2	Understand various phases of service life cycle processes and principles and risks.		
CO3	Implement the improvement process for service management.		
CO4	Use the knowledge of process of service strategy, service design and service		
	transition in real life situation.		
CO5	Use the knowledge of process of service operation and CSI in real life situation.

B. Sc. (Information Technology)		Semester – VI		
Course Name: Cyber Laws		Course Code: SIT607		
		<b>(I</b>	(Elective I)	
Periods per week (1 Period is 50	5			
Credits		2		
		Hours	Marks	
<b>Evaluation System</b>	Theory Examination	2	60	
	Internal		40	

Course Objective
To make learner understand and use
1. IT Act 2000 and its subsequent amendments.
2. Contracts in the digital World.
3. Concept of copyright.
4. Concepts E-Commerce Taxation, Digital Signature, Certifying Authorities and E-
Governance.
5. Protection of Cyber Consumers in India.

Unit	Details	Lectures
I	Power of Arrest Without Warrant Under the IT Act, 2000: A Critique, Crimes of this Millennium, Section 80 of the IT Act, 2000 – A Weapon or a Farce? Forgetting the Line Between Cognizable and Non-Cognizable Offences, Necessity of Arrest without Warrant from AnyPlace,PublicorOtherwise,CheckandBalancesAgainstArbitraryArre sts,Arrest for "About to Commit" an Offence Under the IT Act: A Tribute to Draco, Arrest, But NOPunishment!  Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act,2000: Concept of "Cyber Crime" and the IT Act , 2000, Hacking, Teenage Web Vandals, Cyber Fraud and Cyber Cheating, Virus on the Internet, Defamation, Harassment and Email Abuse, Cyber Pornography, Other IT Act Offences, Monetary Penalties, Adjudication and Appeals Under IT Act , 2000, Network Service Providers, Jurisdiction and Cyber Crime, Nature of Cyber Criminality, Strategies to Tackle Cyber Crime and Trends,Criminal Justice in India and Implications on Cyber Crime.	12
II	Contracts in theInfotech World: Contracts in the Infotech World, Click-Wrap and Shrink-Wrap Contract: Status under the Indian Contract Act, 1872, Contract Formation Under the Indian Contract Act, 1872, Contract Formation on the Internet, Terms and Conditions of Contracts.  Jurisdiction in the Cyber World: Questioning the Jurisdiction and Validity of the Present Law of Jurisdiction, Civil Law of Jurisdiction in India, Cause of Action, Jurisdiction and the Information Technology	12

	Act,2000, Foreign Judgements in India, Place of Cause of Action in Contractual and IPR Disputes, Exclusion Clauses in Contracts, Abuse of Exclusion Clauses, Objection of Lack of Jurisdiction, Misuse of the Law of Jurisdiction, Legal Principles on Jurisdiction in the United State of America, Jurisdiction Disputes w.r.t. the Internet in the United State of America.	
III	Battling Cyber Squatters and Copyright Protection in the Cyber World: Concept of Domain Name and Reply to Cyber Squatters, Meta-Tagging, Legislative and Other Innovative Moves Against Cyber Squatting, The Battle Between Freedom and Control on the Internet, Works in Which Copyright Subsists and meaning of Copyright, Copyright Ownership and Assignment, License of Copyright, Copyright Terms and Respect for Foreign Works, Copyright Infringement, Remedies and Offences, Copyright Protection of Content on the Internet; Copyright Notice, Disclaimer and Acknowledgement, Downloading for Viewing Content on the Internet, Hyper-Linking and Framing, Liability of ISPs for Copyright Violation in the Cyber World: Legal Developments in the US, Napster anditsCousins:ARevolutionontheInternetbutaCrisisfor Copyright Owners, Computer Software Piracy.	12
IV	E-Commerce Taxation: Real Problems in the Virtual World: A TugofWarontheConceptof,,PermanentEstablishment",FindingthePE in Cross Border E-Commerce, The United Nations Model Tax Treaty, The Law of Double Taxation Avoidance Agreements and Taxable Jurisdiction Over Non-Residents, Under the Income Tax Act, 1961, Tax Agents of Non-Residents under the Income Tax Act, 1961 and the Relevance to E-Commerce, Source versus Residence and Classification between Business Income and Royalty, The Impact of the Internet on Customer Duties, Taxation Policies in India: At a Glance.  Digital Signature, Certifying Authorities and E-Governance: Digital Signatures, Digital Signature Certificate, Certifying Authorities and Liability in the Event of DigitalSignature Compromise, E-Governance in India: A Warning to Babudom!	12
V	The Indian Evidence Act of 1872 v. Information Technology Act, 2000: Status of Electronic Records as Evidence, Proof and Management of Electronic Records; Relevancy, Admissibility and Probative Value of E-Evidence, Proving Digital Signatures, Proof of Electronic Agreements, Proving Electronic Messages, Other AmendmentsintheIndianEvidenceActbytheITAct,Amendments totheBankersBooksEvidenceAct,1891andReserveBankofIndia Act, 1934.  Protection of Cyber Consumers in India: Are Cyber Consumers Covered Under the Consumer Protection Act? Goods and Services, Consumer Complaint, Defect in Goods and Deficiency in Services, Restrictive and Unfair Trade Practices, Instances of Unfair Trade	

•	Practices, Reliefs Under CPA, Beware Consumers, Consumer Foras,	
	Jurisdiction and Implications on cyber Consumers in India,	
	Service Providers Based in Foreign Lands Whose Goods are Sold or	
	Services Provided to a Consumer in India.	
	Amendments in Indian IT Act 2000	

Cours	Course Outcome		
Learn	Learner will achieve competency in		
CO1	Knowledge of Cyberspace, Jurisdiction and basic concepts of Cyber Law		
CO2	Jurisdiction in cyberspace, cybercrimes and their legal provisions in India.		
CO3	Knowledge of legal provisions in Information Technology Act, 2000		
CO4	Identify the issues on Internet.		
CO5	Contracts in Digital world like Click-Wrap and Shrink-Wrap Contract.

Practical No	Details
1	Introduction to Android, Introduction to Android Studio IDE, Application Fundamentals: Creating a Project, Android Components, Activities, Services, Content Providers, Broadcast Receivers, Interface overview, Creating Android Virtual device, USB debugging mode, Android Application Overview. Simple "Hello World" program.
2	Programming Resources Android Resources: (Color, Theme, String, Drawable, Dimension, Image),
3	Programming Activities and fragments Activity Life Cycle, Activity methods, Multiple Activities, Life Cycle of fragments and multiple fragments.
4	Programs related to different Layouts  Coordinate, Linear, Relative, Table, Absolute, Frame, List View, Grid View.
5	Programming UI elements AppBar, Fragments, UI Components
6	Programming menus, dialog, dialog fragments
7	Programs on Intents, Events, Listeners and Adapters The Android Intent Class, Using Events and Event Listeners
8	Programs on Services, notification and broadcast receivers
9	Database Programming with SQLite
10	Programming threads, handles and asynchronized programs
11	Programming Media API and Telephone API
12	Programming Security and permissions
13	Programming Network Communications and Services (JSON)

#### **Project Dissertation Semester V**and

#### **Project Implementation Semester VI**

Chapter 1 to 4 should be submitted in Semester V in spiral binding. These chapter have also to be included in Semester VI report. Semester VI report has to be hard bound with golden embossing. Students will be evaluated based on the dissertation in semester V and dissertation and viva voce in Semester VI.

#### I. OBJECTIVES

- Describe the Systems Development Life Cycle(SDLC).
- Evaluate systemsrequirements.
- Complete a problem definition.
- Evaluate a problem definition.
- Determine how to collect information to determine requirements.
- Perform and evaluate feasibility studies like cost-benefit analysis, technical feasibility, time feasibility and Operational feasibility for the project.
- Work on data collection methods for factfinding.
- Construct and evaluate data flowdiagrams.
- Construct and evaluate datadictionaries.
- Evaluate methods of process description to include structured English, decision tables and decisiontrees.
- Evaluate alternative tools for the analysisprocess.
- Create and evaluate such alternative graphical tools as systems flow charts and state transition diagrams.
- Decide the S/W requirement specifications and H/W requirementspecifications.
- Plan the systems design phase of the SDLC.
- Distinguish between logical and physical designrequirements.
- Design and evaluate systemoutputs.
- Design and evaluate systemsinputs.

79<sup>age</sup> 67

- Design and evaluate validity checks for inputdata.
- Design and evaluate user interfaces forinput.
- Design and evaluate file structures to include the use ofindexes.
- Estimate storagerequirements.
- Explain the various file update processes based on the standard fileorganizations.
- Decide various datastructures.
- Construct and evaluate entity-relationship (ER) diagrams for RDBMS related projects.
- Perform normalization for the unnormalized tables for RDBMS related projects
- Decide the various processing systems to include distributed, client/server, online and others.
- Perform project cost estimates using varioustechniques.
- Schedule projects using both GANTT and PERTcharts.
- Perform coding for the project.
- Documentation requirements and prepare and evaluate systemsdocumentation.
- Perform various systems testing techniques/strategies to include the phases oftesting.
- Systems implementation and its keyproblems.
- Generate various reports.
- Be able to prepare and evaluate a finalreport.
- Brief the maintenance procedures and the role of configuration management inoperations.
- To decide the future scope and further enhancement of the system.
- Plan for several appendices to be placed in support with the project reportdocumentation.
- Work effectively as an individual or as a team member to produce correct, efficient, wellorganized and documented programs in a reasonabletime.
- Recognize problems that are amenable to computer solutions, and knowledge of the tool necessary for solving suchproblems.
- Develop of the ability to assess the implications of workperformed.
- Get good exposure and command in one or more application areas and on thesoftware
- Develop quality software using the software engineering principles
- Develop of the ability to communicate effectively.

89

#### II. Type of the Project

The majority of the students are expected to work on a real-life project preferably in some industry/ Research and Development Laboratories/Educational Institution/Software Company. Students are encouraged to work in the areas listedbellow. However, it is *not mandatory* for a student to work on a real-life project. The student can formulate a project problem with the help of her/his Guide and submit the project proposal of the same.

**Approval of the project proposal is mandatory**. If approved, the student can commence working on it, and complete it. Use the latest versions of the software packages for the development of the project.

#### III. SOFTWARE AND BROAD AREAS OF APPLICATION

FRONT END / GUI Tools	.Net Technelegies,Java
DBMS/BACK END	Oracle, SQL Plus, MY SQL, SQL Server,
LANGUAGES	C, C++, Java, VC++, C#, R,Pythen
SCRIPTING LANGUAGES	PHP,JSP, SHELL Scripts (Unix), TcL/TK,
.NET Platform	F#,C#. Net, Visual C#. Net, ASP.Net
MIDDLE	COM/DCOM, Active-X, EJB
WARE(COMPONE NT) TECHNOLOGIES	
UNIX INTERNALS	Device Drivers, RPC, Threads, Socket programming
NETWORK/WIRELESS TECHNOLOGIES	-
REALTIME OPERATING SYSTEM/ EMBEDDED SKILLS	LINUX, Raspwerry Pi, Arduine, 8051
APPLICATION AREAS	Financial / Insurance / Manufacturing / Multimedia / Computer Graphics / Instructional Design/ Database Management System/ Internet / Intranet / Computer Networking-Communication Software development/ E-Commerce/ ERP/ MRP/ TCP-IP programming / Routing protocols programming/ Socket programming.

#### **IV.Introduction**

The project report should be documented with scientific approach to the solution of the problem that the students have sought to address. The project report should be prepared in order to solve the problem in a methodical and professional manner, making due references to appropriate techniques, technologies and professional standards. The student should start the documentation process from the first phase of software development so that one can easily identify the issues to be focused upon in the ultimate project report. The student should also include the details from the project diary, in which they will record the progress of their project throughout the course. The project report should contain enough details to enable examiners to evaluate the work. The important points should be highlighted in the body of the report, with details often referred to appendices.

#### 1.1 PROJECT REPORT:

Title Page

Original Copy of the Approved Proforma of the Project Proposal Certificate of Authenticated work

Role and Responsibility Form Abstract

Table of Contents

Table of Figures

#### **CHAPTER 1: INTRODUCTION**

- 1.1 Background
- 1.2 Objectives
- 1.3 Purpose, Scope, and Applicability
  - 1.3.1 Purpose
  - 1.3.2 Scope
  - 1.3.3 Applicability
- 1.4 Achievements
- 1.5 Organisation of Report

**CHAPTER 2: SURVEY OF** 

**TECHNOLOGIES CHAPTER 3:** 

 $P_{age}70$ 

#### REQUIREMENTS AND ANALYSIS

- 3.1 Problem Definition
- 3.2 RequirementsSpecification
- 3.3 Planning and Scheduling
- 3.4 Software and HardwareRequirements
- 3.5 Preliminary ProductDescription
- 3.6 Conceptual Models

#### **CHAPTER 4: SYSTEM DESIGN**

- 4.1 Basic Modules
- 4.2 Data Design
  - 4.2.1 Schema Design
  - 4.2.2 Data Integrity and Constraints
- 4.3 Procedural Design
  - 4.3.1 LogicDiagrams
  - 4.3.2 Data Structures
  - 4.3.3 AlgorithmsDesign
- 4.4 User interfacedesign
- 4.5 SecurityIssues
- 4.6 Test CasesDesign

The documentation should use tools like star UML, Visuo for windows, Rational Rose for design as part of Software Project Management Practical Course. The documentation should be spiral bound for semester V and the entire documentation should be hard bound during semester VI.

#### **CHAPTER 5: IMPLEMENTATION AND TESTING**

- 5.1 ImplementationApproaches
- 5.2 Coding Details and CodeEfficiency
  - 5.2.1 CodeEfficiency
- 5.3 TestingApproach
  - 5.3.1 Unit Testing
  - 5.3.2 IntegratedTesting
  - 5.3.3 Beta Testing

Page 71

- 5.4 Modifications and Improvements
- 5.5 TestCases

#### CHAPTER 6: RESULTS AND DISCUSSION

- 6.1 TestReports
- 6.2 User Documentation

#### **CHAPTER 7:CONCLUSIONS**

- 7.1 Conclusion
  - 7.1.1 Significance of the System
- 7.2 Limitations of System
- 7.3 Future Scope of project
- 7.4 References

**GLOSSARY** 

APPENDEX A

APPENDEX B

#### V. EXPLANATION OF CONTENTS

#### **Title Page**

Sample format of Title page is given in Appendix 1 of this block. Students should follow the given format.

Original Copy of the Approved Proforma of the Project Proposal

Sample Proforma of Project Proposal is given in Appendix 2 of this block. Students should follow the given format.

#### **Certificate of Authenticated work**

Sample format of Certificate of Authenticated work is given in Appendix 3 of this block. Students should follow the given format.

#### **Role and Responsibility Form**

Sample format for Role and Responsibility Form is given in Appendix 4 of this block. Students should follow the given format.

#### **Abstract**

This should be one/two short paragraphs (100-150 words total), summarising the project work. It is important that this is not just a re-statement of the original project outline. A suggested flow is background, project aims and main achievements. From the abstract, a reader should be able to ascertain if the project is of interest to them and, it should present results of which they may wish to know more details.

#### Acknowledgements

This should express student's gratitude to those who have helped in the preparation of project.

**Table of Contents:** The table of contents gives the readers a view of the detailed structure of the report. The students would need to provide section and subsection headings with associated pages. The formatting details of these sections and subsections are given below.

**Table of Figures:** List of all Figures, Tables, Graphs, Charts etc. along with their page numbers in a table offigures.

#### **Chapter 1: Introduction**

The introduction has several parts as given below:

**Background:** A description of the background and context of the project and its relation to work already done in the area. Summarise existing work in the area concerned with the project work.

**Objectives:** Concise statement of the aims and objectives of the project. Define exactly what is going to be done in the project; the objectives should be about 30 /40 words.

**Purpose, Scope and Applicability:** The description of Purpose, Scope, and Applicability are given below:

**Purpose:** Description of the topic of the project that answers questions on why this project is being done. How the project could improve the system its significance and theoretical framework.

**Scope:** A brief overview of the methodology, assumptions and limitations. The students should answer the question: What are the main issues being covered in the project? What are the main functions of the project?

**Applicability:** The student should explain the direct and indirect applications of their work. Briefly discuss how this project will serve the computer world andpeople.

Achievements: Explain what knowledge the student achieved after the completion of the

work. What contributions has the project made to the chosen area? Goals achieved - describes the degree to which the findings support the original objectives laid out by the project. The goals may be partially or fully achieved, orexceeded.

**Organisation of Report:** Summarising the remaining chapters of the project report, in effect, giving the reader an overview of what is to come in the project report.

#### **Chapter 2: Survey of Technologies**

In this chapter Survey of Technologies should demonstrate the students awareness and understanding of Available Technologies related to the topic of the project. The student should give the detail of all the related technologies that are necessary to complete the project. The student should describe the technologies available in the chosen area and present a comparative study of all those Available Technologies. Explain why the student selected the one technology for the completion of the objectives of the project.

#### **Chapter 3: Requirements and Analysis**

**Problem Definition:** Define the problem on which the students are working in the project. Provide details of the overall problem and then divide the problem in to sub-problems. Define each sub-problemclearly.

**Requirements Specification:** In this phase the student should define the requirements of the system, independent of how these requirements will be accomplished. The Requirements Specification describes the things in the system and the actions that can be done on these things. Identify the operation and problems of the existing system.

**Planning and Scheduling:** Planning and scheduling is a complicated part of software development. Planning, for our purposes, can be thought of as determining all the small tasks that must be carried out in order to accomplish the goal. Planning also takes into account, rules, known as constraints, which, control when certain tasks can or cannot happen. Scheduling can be thought of as determining whether adequate resources are available to carry out the plan. The student should show the Gantt chart and Program Evaluation Review Technique(PERT).

**Software and Hardware Requirements:** Define the details of all the software and hardware needed for the development and implementation of the project.

**Hardware Requirement:** In this section, the equipment, graphics card, numeric coprocessor, mouse, disk capacity, RAM capacity etc. necessary to run the software must benoted.

**Software Requirements:** In this section, the operating system, the compiler, testing tools, linker, and the libraries etc. necessary to compile, link and install the software must be listed. Preliminary Product Description: Identify the requirements and objectives of the new system. Define the functions and operation of the application/system the students are developing as project.

**Conceptual Models:** The student should understand the problem domain and produce a model of the system, which describes operations that can be performed on the system, and the allowable sequences of those operations. Conceptual Models could consist of complete Data Flow Diagrams, ER diagrams, Object-oriented diagrams, System Flowcharts etc.

#### **Chapter 4: System Design**

Describes desired features and operations in detail, including screen layouts, business rules, process diagrams, pseudocode and other documentation.

Basic Modules: The students should follow the divide and conquer theory, so divide the overall problem into more manageable parts and develop each part or module separately. When all modules are ready, the student should integrate all the modules into one system. In this phase, the student should briefly describe all the modules and the functionality of these modules.

**Data Design:** Data design will consist of how data is organised, managed and manipulated.

**Schema Design:** Define the structure and explanation of schemas used in the project.

**Data Integrity and Constraints:** Define and explain all the validity checks and constraints provided to maintain dataintegrity.

**Procedural Design:** Procedural design is a systematic way for developing algorithms or procedurals.

**Logic Diagrams:** Define the systematical flow of procedure that improves its comprehension and helps the programmer during implementation. e.g., Control Flow Chart, Process Diagrams etc.

**Data Structures:** Create and define the data structure used inprocedures.

Algorithms Design: With proper explanations of input data, output data, logic of

processes, design and explain the working of algorithms.

**User Interface Design:** Define user, task, environment analysis and how to map those requirements in order to develop a "User Interface". Describe the external and internal components and the architecture of user interface. Show some rough pictorial views of the user interface and its components.

**Security Issues:** Discuss Real-time considerations and Security issues related to the project and explain how the student intends avoiding those security problems. What are the security policy plans and architecture?

**Test Cases Design:** Define test cases, which will provide easy detection of errors and mistakes with in a minimum period of time and with the least effort. Explain the different conditions in which the students wish to ensure the correct working of the project.

#### **Chapter 5: Implementation and Testing**

**Implementation Approaches:** Define the plan of implementation, and the standards the students have used in the implementation.

Coding Details and Code Efficiency: Students not need include full source code, instead, include only the important codes (algorithms, applets code, forms code etc). The program code should contain comments needed for explaining the work a piece of code does. Comments may be needed to explain why it does it, or, why it does a particular way.

The student can explain the function of the code with a shot of the output screen of that program code.

**Code Efficiency:** The student should explain how the code is efficient and how the students have handled codeoptimisation.

Testing Approach: Testing should be according to the scheme presented in the system design chapter and should follow some suitable model - e.g., category partition, state machine-based. Both functional testing and user-acceptance testing are appropriate. Explain the approach of testing.

**Unit Testing:** Unit testing deals with testing a unit or module as a whole. This would test the interaction of many functions but, do confine the test within one module.

**Integrated Testing:** Brings all the modules together into a special testing environment, then checks for errors, bugs and interoperability. It deals with tests for the entire application.

Application limits and features are testedhere.

**Modifications and Improvements:** Once the students finish the testing they are bound to be faced with bugs, errors and they will need to modify your source code to improve the system. Define what modification are implemented in the system and how it improved the system.

#### **Chapter 6: Results and Discussion**

**Test Reports:** Explain the test results and reports based on the test cases, which should show that the projectis capable of facing any problematic situation and that it works fine in different conditions. Take the different sample inputs and show the outputs.

**User Documentation:** Define the working of the software; explain its different functions, components with screen shots. The user document should provide all the details of the product in such a way that any user reading the manual, is able to understand the working and functionality of the document.

#### **Chapter 7: Conclusions**

**Conclusion:** The conclusions can be summarised in a fairly short chapter (2 or 3 pages). This chapter brings together many of the points that would have made in the other chapters.

**Limitations of the System:** Explain the limitations encountered during the testing of the project that the students were not able to modify. List the criticisms accepted during the demonstrations of the project.

**Future Scope of the Project describes two things:** firstly, new areas of investigation prompted by developments in this project, and secondly, parts of the current work that was not completed due to time constraints and/or problems encountered.

#### REFERENCES

It is very important that the students acknowledge the work of others that they have used or adapted in their own work, or that provides the essential background or context to the project. The use of references is the standard way to do this. Please follow the given standard for the references for books, journals, and online material. The citation is mandatory in both the reports.

Page 77

Elaine Ritchie, J Knite. (2001). Artificial Intelligence, Chapter 2, p.p 23 - 44. Tata McGrawHill.

**GLOSSARY** 

If you the students any acronyms, abbreviations, symbols, or uncommon terms in the project report then their meaning should be explained where they first occur. If they go on to use any of them extensively then it is helpful to list them in this section and define the meaning.

**APPENDICES** 

These may be provided to include further details of results, mathematical derivations, certain illustrative parts of the program code (e.g., class interfaces), user documentation etc. In particular, if there are technical details of the work done that might be useful to others who wish to build on this work, but that are not sufficiently important to the project as a whole to justify being discussed in the main body of the project, then they should be included as appendices.

VI. SUMMARY

Project development usually involves an engineering approach to the design and development of a software system that fulfils a practical need. Projects also often form an important focus for discussion at interviews with future employers as they provide a detailed example of what the students are capable of achieving. In this course the students can choose your project topic from the lists given in Unit 4: Category-wise Problem Definition.

Sample Figure

Fig. 3.1: Caption

### **Chapter 4**

### Implementation and Testing (20 bold, centered)

#### 4.1 Code (Place Coresegments)

Content includes description about coding phase in your project (Font-12) (\*don"tincludecompletecode -----justdescription)

#### 4.2 Testing Approach

Subheadings are as shown below with following format (16 bold, CAPS)

- 4.2.1 UnitTesting
- 4.2.2 IntegrationTesting

#### Note:

- > Explain about above testingmethods
- Explain how the above techniques are applied in your project
- Provide Test plans, test cases, etc relevant to your project

### **Chapter 5**

### Results and Discussions(20 bold, centered)

Note: Place Screen Shots and write the functionality of each screen at the bottom

### **Chapter 6**

### Conclusion and Future Work (20 bold, centered)

The conclusions can be summarized in a fairly short chapter around 300 words. Also include limitations of your system and future scope (12, justified)

### **Chapter 7**

#### References (20 bold, centered)

Content (12, LEFT)

[1] Title of the book, Author

[2] Full URL of onlinereferences

#### \*NOTE ABOUT PROJECT VIVA VOCE:

Student may be asked to write code for problem during VIVA to demonstrate his coding capabilities and he/she may be asked to write any segment of coding used in the in the project. The project can be done in group of at most four students. However, the length and depth of the project should be justified for the projects done in group. A big project can be modularised and different modules can be assigned as separate project to different students.

Marks Distribution:

[3]

Semester V: 50 Marks
Documentation: 50 marks
Semester VI: 150 Marks
Documentation: 50 Marks:

Implementation and Viva Voce: 100 Marks

The plagiarism should be maintained as per the UGC guidelines.

#### **Evaluation Scheme**

- 1. Internal Evaluation (40Marks).
  - i. Test: 1 Class test of 15 marks. (Can be takenonline)

Q	Attempt <u>any three</u> of the following:	15
a.		
b.		
c.		
d.		
e.		
f.		

- ii. 15 marks project / presentation
- iii. 10 marks: Active participation in the class, overall conduct, attendance.
- 2. External Examination: (60marks)

	All questions are compulsory	
Q1	(Based on whole syllabus) Attempt <u>any two</u> of the following:	10
a.		
b.		
c.		
d.		
Q2	(Based on Unit 1) Attempt <u>any two</u> of the following:	10
Q3	(Based on Unit 2) Attempt <u>any two</u> of the following:	10
Q4	(Based on Unit 3) Attempt <u>any two</u> of the following:	10
Q5	(Based on Unit 4) Attempt <u>any two</u> of the following:	10
Q6	(Based on Unit 5) Attempt <u>any two</u> of the following:	10

- 3. Practical Exam: 50marks
  - A Certified copy journal is essential to appear or the practical examination.

1.	Practical Question 1	20
2.	Practical Question 2	20
3.	Journal	5
4.	Viva Voce	5

OR

1.	Practical Question	40
2.	Journal	5
3.	Viva Voce	5

## **KET's V. G. Vaze College(Autonomous) Board of Studies – Information Technology** comprised of following members

Mrs. Pournima P Bhangale, Chairperson

Mrs. Vandana Y Kadam, Member

Mrs. Rakhee D Rane, Member

Mrs. Nanda A Rupnar, Member

Ms. Mohini Bhole, Member

Ms. Pranali Pawar, Member

Professor (Dr.) Ajay S Patil, Subject Expert, North Maharashtra University

Dr. Rajendra B Patil, Subject Expert, VC Nominee

Mr. Yogesh Tambe, Industry Representative

Mr. Gandhar Patwardhan, Alumni Representative

Mrs. Pournima P Bhangale

Chairperson

Dr. Rajendra B Patil,

Subject Expert, VC Nominee
